

Projection Welding Machine

Why Choose Electra Koko Tawa Projection Welding Machines?

- **Proven Technology:** Incorporates advanced KOKO-TAWA Japanese technology for unmatched precision and durability.
- **Versatile Applications:** Designed for diverse industries, including almirah manufacturing, gas stoves, auto components, heating elements, kitchen utensils, and water heaters, etc.
- **Robust and Efficient:** Built with industrial-grade materials and advanced water-cooling systems for long-lasting performance.
- **Comprehensive Warranty:** Backed by a 3-year full warranty, ensuring confidence and reliability with every weld.
- **Proudly Indian:** Manufactured in Noida, India, blending local expertise with global quality standards.

Features

- **Multiple Applications:** Suitable for almirah manufacturing, gas stoves, auto components, heating elements, water heaters, and heavy-duty fabrication.
- **100% Copper Transformer:** Ensures superior conductivity, durability, and high-performance welding.
- **Cooling System:** Advanced water-cooled transformer design for maximum efficiency and prolonged equipment life.
- **Warranty:** Backed by a 3-year full warranty for assured reliability and peace of mind.
- **Made in India:** Designed and manufactured with precision by Electra Koko Tawa in Noida, India.

Model Specifications

Model	Capacity	Power (KVA)	Voltage (V)	Max Thickness (mm)	Applications	Cooling	Warranty
Model-25KVA	25 KVA	25	440	Up to 3 mm	Almirah manufacturing, gas stoves	Water-Cooled	3 Years
Model-35KVA	35 KVA	35	440	Up to 5 mm	Heating elements, water heaters	Water-Cooled	3 Years
Model-50KVA	50 KVA	50	440	Up to 8 mm	Auto components, heating elements	Water-Cooled	3 Years
Model-75KVA	75 KVA	75	440	Up to 10 mm	Almirah manufacturing, heavy-duty fabrication	Water-Cooled	3 Years
Model-100KVA	100 KVA	100	440	Up to 12 mm	Infrastructure, industrial heating components	Water-Cooled	3 Years

Applications

- **Almirah Manufacturing:** Ensures precise and durable welding for almirahs and other furniture.
- **Gas Stoves:** Reliable performance for high-quality gas stove assembly.
- **Auto Components:** Efficiently handles automotive parts for robust joining.
- **Heating Elements:** Suitable for manufacturing high-precision heating components.
- **Water Heaters:** Ideal for assembling water heater parts and similar appliances.
- **Heavy-Duty Fabrication:** Handles industrial-grade components and infrastructure needs.
- **Kitchen Utensils:** Cooker handles, Locks, Frames, Stands, Baskets, Wire Mesh etc.
